Schlieren, December 2009

Discontinuation of paper recorder REC 01

Dear Ladies and Gentlemen

We wish to inform you about the discontinuation of the 3-channel paper recorder REC 01, which you acquired in connection with a Schlatter Flash Butt Welder (for rails).

Because the paper recorder is now obsolete, the manufacturer of the device is no longer able to offer a service for it.

The discontinued product can be repaired until end of February 2010, depending on the technical feasibility and availability of spare parts.

1 Replacement product: Schlatter WeldAnalyzer - the latest generation

For the obsolete equipment we provide the WeldAnalyzer as an alternative. The WeldAnalyzer is a PC-based electronic data- collection, monitoring and documentation system for the performed welds on your system. The program registers monitors and analyzes the three parameters - welding force, welding current and travel of a Flash Butt Welder, and records them on in real time.

Input signals from the welding machine or from SWEP 06 are transferred from the PC and digitized. A special function allows easy calibration of the input signals. Changes in the weld program are carried out on the SWEP-Editor. When a particular type of rail is determined, the appropriate welding program will be loaded.

The welding process can be presented as graphic or text and automatically be saved and printed. For critical phases of the welding process, limits can be defined and compliance is checked for each weld. All parameters such as set-up data, calibration data and limits are periodically backed up by the automatic backup system.

2 Compatibility

The upgrade to WeldAnalyzer for all Flash Butt Welders equipped with a SWEP 06 is done with a standard procedure.

3 Possible actions

Please check your equipment and machinery, and contact us. Our helpdesk will be happy to help you.

4 Exchange by a Schlatter service engineer

The replacement and installation of equipment will be undertaken by a qualified Schlatter service technician within three to four days, including a theoretical and practical introduction. That reduces the downtime of your plant to a minimum.

For questions and information we are at your disposal at any time.

Please contact our helpdesk on outstanding issues on telephone number +41 (0) 44 732 74 20.

For a quotation or order please use the contact-form or contact our spare-parts department at +41 (0) 44 732 71 11 or via E-Mail to ersatzteile@schlattergroup.com
