Discontinuation of Schlatter HUSI Commander

Dear Ladies and Gentlemen

With this letter we inform you about the discontinuation of the control panel HUSI Commander which was delivered with your Posiweld welding machine.

Because of the advanced life-span of the HUSI control panel the manufacturer is not able to offer further service or repair for beyond the end of 2010. This will also depend on availability of spare parts.

1 Replacement product: Schlatter Commander

For the discontinued product we can offer you as replacement the control panel Schlatter Commander. The Schlatter Commander is a newly developed and optimized version of its predecessor. Furthermore the Commander is lighter and handier than its predecessor and its ergonomic form better adapted to the operator requirements.

2 Compatibility

The Schlatter Commander is compatible to his predecessor. Complete NC programmes will be transferred directly. As before the programming of the welding programs and the control of the machine can be done through the external created PC interface.

3 Possible actions

Please check your equipment and machinery, and contact us if you have questions. Our helpdesk will be pleased to help you T +41 44 732 74 20.

4 Exchange by a Schlatter service engineer

The replacement and installation of equipment will be undertaken by a Schlatter service technician within three to four days. This includes a theoretical and practical introduction. This reduces the downtime of your plant to a minimum.

For questions and information we are at your disposal at any time.

For a quotation or order please use the contact-form or contact our spare-parts department via E-Mail spareparts@schlattergroup.com
