Spare parts supplied by the original equipment manufacturer

Plants and systems are ever more complex. Only if all parts of a system are compatible with each other and are of the same high quality, is it possible to ensure that operations run smoothly. The quality of spare parts is therefore of vital importance for the operational reliability of plants. Schlatter spare parts are manufactured with great care, fit effortlessly into systems as a whole when installed and ensure that the plant continues to operate and produce to the usual high quality standards.

A reliable partner in plant construction

The Schlatter Group is a world leader in plant manufacturing for resistance welding systems and weaving machines for special applications. With long-standing expertise in industrial engineering, innovative flair and a reliable customer service, the company Group listed in Switzerland provides production systems offering high performance and quality.

Core competence

Schlatter has almost 100 years of expertise in plant construction, customer-oriented solutions, a world-wide presence and more than 500 dedicated employees. The combination of expertise in welding and systems technology makes Schlatter a reliable partner in plant construction.

Segment resistance welding

Schlatter has acquired unique experience in the development and production of reinforcing and industrial mesh welding systems, mobile and stationary rail welding machines as well as systems for manufacturing radiators.
