

System ROTO CUT

The straightening and cutting machine that produces straight wires continuously at high speed of up to 6m/s

ROTOCUT integrated

Integrated into your production plant between stretching- /cold rolling machine and mesh welding line.

Plant design:

- horizontal- or overhead pay-offs
- stretching-/cold rolling machine
- pre pay-off
- loop
- ROTO CUT base module with advance, rotating straightening unit and flying shears
- straightening extension up to 3,2 m rod length

Max. number of wire rods up to 167 per minute.

<i>Diameter</i>	<i>Straightening speed</i>
4 – 4.5 mm	5.0 m/sec
5 – 5.5 mm	5.5 m/sec
6 – 9.5 mm	6.0 m/sec
10 – 10.5 mm	4.5 m/sec
11 – 12 mm	3.0 m/sec

ROTOCUT stand alone

The flexible concept for straightening and cutting of cross wire rods for standard- and special mesh.

Plant design:

- active horizontal or vertical spool pay-off with wire compensation unit and integrated wire supervision
- alternatively in connection with a stretching-/cold rolling machine and loop
- RTOCUT base module with advance, rotating straightening unit and flying shears
- straightening extension up to 3,2 m rod length
- automatic movable collecting trays

The RTOCUT system straightens and cuts reinforcing steels (KR/WR) with a wire diameter up to 8 mm in connection with a spool pay-off or up to a wire diameter of 12 mm in connection with a stretching-/cold rolling machine.

H.A. Schlatter AG

Schlatter is the leading machine manufacturer worldwide for individual solutions in the field of resistance welding. With innovative plants and exceptional services we earn the confidence of our customers every day. Since its founding in 1916 Schlatter has pioneered and extended its core competences welding techniques, mechatronics and system technique. Innovation, quality, service and high product safety are the four most important attributes for our up-to-date solutions. Thanks to the modular construction, our plants can be tailored and upgraded to meet individual requirements at any time. For our customers this means security over the complete range – right from the beginning.

Service for your benefit

The range of services offered by Schlatter is designated to increase your productivity and to increase the life time of your plant. Our multilingual helpdesk team answers your questions and assists you in eliminating malfunctions – by telephone or via Internet. Our field service specialists offer world-wide competent support in the field and take care of a variety of tasks. Furthermore, we have our own workshop for repair works and overhauls of your control units and mechanical components. An efficient spare parts service and versatile training courses complete our services. We shall be pleased to discuss with you your individual requirements and offer you a tailor-made service package.
