Ad hoc announcement pursuant to article 53 LR

Schlatter increases net sales and earnings in the first half of 2023

S c h l i e r e n, 17 August 2023 In the first half of 2023, the Schlatter Group posted order intake

of CHF 62.4 million, which was lower than in the comparable period of the previous year (first

half of 2022: CHF 94.6 million). The Group recorded a 31% rise in net sales to CHF 67.4 million

(first half of 2022: CHF 51.3 million). At CHF 84.4 million, the order backlog as at 30 June 2023

was close to the level at year-end 2022 (31 December 2022: CHF 89.4 million). Operating profit

(EBIT) for the first half of 2023 totalled CHF 3.7 million (EBIT margin: 5.4%), compared with

CHF 2.9 million (EBIT margin: 5.7%) in the first half of 2022. For the first half of the year, the

Schlatter Group is reporting a positive net result of CHF 3.3 million (first half of 2022: CHF 2.0

million).

Demand for Schlatter products normalized in the first half of 2023. In particular, demand for re-

inforcing mesh production systems and weaving machinery for the paper industry dropped fol-

lowing a period of market overheating. By contrast, after-sales volumes remained at a high level,

while the number of industrial mesh production systems and rail welding systems sold increased.

Suppliers' delivery problems have eased in some areas, but the resulting backlogs continued to

weigh on productivity. Prices of sourced materials did not rise as fast but are still holding back

earnings, while further appreciation of the Swiss franc put further pressure on earnings.

Welding segment 1st half of 2023

Key figures

Order intake: CHF 50.9 million (first half of 2022: CHF 71.7 million).

Net sales: CHF 51.5 million (first half of 2022: CHF 44.5 million).

Order backlog: CHF 61.9 million (31 December 2022: CHF 62.5 million).

2

Order intake in the welding segment was above expectations in the first half of the year and

roughly corresponds to segment capacity. While there was a significant drop in order volume for

reinforcing mesh production systems, order intake increased in the other product areas. As a re-

sult of supply bottlenecks, especially for electrical and control components, there were delays in

the delivery of machinery. The delivery backlog has lasted for longer than had been anticipated

and will continue to have a significant impact in the second half of 2023.

Welding segment outlook

Given the present order backlog, good capacity utilization is ensured in the welding segment in

2023 and beyond. Delivery delays should be resolved by the final quarter of the year. For the most

part, selling prices for machines and systems are fixed, so the cost increases weigh heavily on the

margin. Schlatter assumes that price rises for the Schlatter product range in the fourth quarter of

2023 will have a more favourable effect on the margin. Inquiry activity remains good and is

roughly in line with existing capacity, but orders are significantly dependent on overall economic

developments.

Weaving segment 1st half of 2023

Key figures

Order intake: CHF 11.5 million (first half of 2022: CHF 22.9 million).

Net sales: CHF 15.9 million (first half of 2022: CHF 6.8 million).

Order backlog: CHF 22.5 million (31 December 2022: CHF 26.9 million).

Capacity utilization in the weaving segment is secured until the end of 2024. Nevertheless, further

orders for reinforcing mesh production systems are necessary for full capacity utilization at the

Münster site. The measures implemented at this site in the past financial year have had the de-

sired effect on earnings and a clear return to profitability has been achieved. However, costs need

to be reduced further and placed on a more flexible basis in the medium term.

3

Outlook for the weaving segment

The weaving segment is embarking on the second half of 2023 with a high order backlog. Including

the welding modules for reinforcing mesh production systems and machinery for the manufac-

ture in Münster of mobile fences, capacity utilization at this site in the current financial year and

beyond is healthy. Capacity utilization in the weaving segment is secured until year-end 2024. The

focus is on continuing to implement the medium and long-term measures. The high order intake

from China in recent periods has come to an end. Orders from western markets are picking up,

but order volume is lower than from China. Downside effects come from the steep rise in material

prices and the availability of parts, especially electrical components.

Outlook Schlatter Group

The Schlatter Group has successfully launched product innovations and stepped-up marketing in

regions where the company was previously under-represented. The organization has been

strengthened by increasing the headcount. In addition, it has extended services business. As a

result of the significant profit in the first half of 2023, equity was strengthened. Downside factors

were higher prices for parts and components, further appreciation of the Swiss franc, delivery

delays due to supply bottlenecks, and the resulting backlog in the delivery of machinery.

The markets for reinforcing mesh production machinery and weaving machinery for the paper

industry have normalized following a period of overheating, especially in the first half of the pre-

vious year. Thanks to the pleasing rise in the sale of industrial mesh production and rail welding

systems, order intake remained at a satisfactory level – albeit lower – and was roughly in line with

our capacity.

The Schlatter Group has ended the first half of 2023 with a high order backlog, which ensures

good capacity utilization until mid-2024. Timely implementation of customer projects has priority.

Other focal areas are implementing innovations and the introduction of more flexible cost struc-

tures. The Board of Directors and the management expect the operating result in the second half

of the year to be around the same level as in the first half.

Schlatter Group (www.schlattergroup.com)

The Schlatter Group is one of the leading specialists in plant engineering for resistance welding systems as well as weaving and finishing equipment for the production of paper machine clothing, wire fabrics and wire mesh. Thanks to its many years of experience in the field of plant technology, its innovative strength and its reliable service, the Schlatter Group — which is listed on the Swiss Reporting Standard of SIX Swiss Exchange — guarantees its customers a range of powerful and high-quality production equipment.
